Review: This is a solid book on an under-researched topic: cats. The first three chapters provide a context for thinking about cats in today's world. The author discusses the history of the domestication of cats and traces their emergence as a truly global phenomenon. In the middle chapters, the focus is on how different the senses and brains of cats are from...

Description: Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on the planet, and yet cats remain more mysterious, even to their most adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection...
